**EULANETCERMAT
Nano-technologies**

EULANETCERMAT

We are in month 6 of EULANETCERMAT project

- Now we need to start with the mobility programme described in the DoW, and based in high level laboratories/partners exchanges
- Now we know the real capacities of each partner, clear complementary
- We have good opportunities in order to develop interactions between partner
- EULANETCERMAT can open future doors for young people

- The collaboration with SMEs is a priority
- Innovation and the results transfer are a key factors
- Interaction with the civil society is quiet important

Calendar for 2013 - 2014:

- The first year finish on October 2013
- The first rapport will be accomplished 1-2 months later
- The interim rapport will be accomplished in month 24: with all the scientific and administrative results

Next future:

- **H2020 is our new opportunity for collaboration**
from 2014 - to 2020

THANKS

- **Thanks to IRELAC staff for the excellent organization**
- **And to all partners, and public in general including, of course, the student who have attended**
- **Finally to the IRSES, People - Marie Curie Actions**
